BORN IN ACTION
DESIGNED TO SURVIVE

FRONT LINE

Ever since its inception in 1961, FRONT LINE has been manufacturing Tier-1 quality products, combining old world fine craftsmanship and cutting-edge raw-materials and technology.

Whether this would be our proprietary ultra-modern KNG, or the classic hand-crafted, vegetable-tanned leather, an IWB or a drop leg system, with our level III retention HDL™ lock or our SR™ lock – we cover them all, and far beyond.

We vigorously strive to upgrade and update our product line on a regular basis, based on combat experience, meeting the stringent requirements and harshest environments worldwide elite units are facing with.

Years and years of experience, professionalism, commitment and dedication are brought to each and every product our team produces with extra attention to details.

Elite worldwide Spec-Ops, military and law enforcement units use and rely on our products on a daily basis, while performing their high-risk missions, and we are honored to have these as our valued customers, to name a few:

The Israeli Police, SWAT, Secret Service, Prison Service and Defense Forces.

The last couple of years were full of hectic and fruitful activity, in which we have supplied the Israeli Police with thousands of new complete officer's rigs, the secret service with new #K38 IWB Kydex holsters, a Brazilian police agency with our drop leg systems, the Finnish police with inner & outer duty belts and a German police agency with a Low Ride HDL service holsters.

The next couple of years will be first and foremost dedicated to ongoing product improvement and attention and compliance to new market trends and demands.
We plan and work on developing new wearing options, adding new finishes and possibly adding new raw-materials.

We already cooperate with some of the leading firearm manufacturing companies, and we plan on keep on doing so in the coming future, so to provide them with best "home" for their firearm.

Respectfully,

Shmuel Shachar
General Manager

ELASTIC 2181

- ▶ Padded strap, secured around the ankle by a dual Velcro closure
- ▶ Vertical Strap secures and stabilizes the pistol above the calf
- ▶ Elastic holster – fits a large variety of pistols and revolvers
- ▶ Velcro safety strap closure secures the pistol

THUMB-BREAK 2179

- ▶ Padded strap, secured around the ankle by a dual Velcro closure
- ▶ Vertical strap secures and stabilizes the pistol above the calf
- ▶ Thumb-break closure
- ▶ Available for micro-compact pistols and up to a 2" revolver – Please specify your pistol model

VELCRO SAFETY STRAP 2180

- ▶ Padded strap, secured around the ankle by a dual Velcro closure
- ▶ Velcro safety strap closure secures the pistol

MODEL	COMPATIBILITY
21801	Micro compact pistols (i.e: Glock 43)
21802	Compact pistols (i.e: C.Z 83)
21803	2" Revolvers
21804	Micro compact pistols (i.e: Glock 26)

DOUBLE MAGAZINE POUCH 2178

- ▶ Padded strap, secured around the ankle by a dual Velcro closure
- ▶ Elastic pouches – fits a large variety of magazines

DUTY BELTS

B2009 INNER & OUTER

- ▶ Outer accessory layer is 57mm wide, made out of Cordura and rigid Polypropylene
- ▶ Inner layer is 90mm wide, and made out of knitted fabric that provides comfortable padding and allows free airflow between the waist and belt
- ▶ The 2 belt layers are connected to each other with Velcro and built-in belt keepers,
- ▶ A 3-point HD release buckle which provides secured closure

B2018 MOLLE COMBAT BELT

- ▶ A 90mm wide MOLLE combat belt
- ▶ Multi-layered: Corudura, rigid PVC, Polypropylene and an inner layer made out of knitted fabric that provides comfortable padding and allows free airflow between the waist and belt.
- ▶ Anti-slip material on the inner portion for enhanced grip and stability
- ▶ Left and right connection polymer D rings
- ▶ A 3-point HD release buckle which provides a secured closure

B2017 INNER & OUTER

- ▶ Dual, inner and outer belt
- ▶ outer belt is 50mm wide. Made out of high-density webbing and Velcro on its inner side
- ▶ Inner belt is 75mm wide, and made out of knitted fabric that provides comfortable padding and allows free airflow between the waist and belt.
- ▶ Anti-slip material on the inner portion for enhanced grip and stability
- ▶ A 3-point HD release buckle on the outer belt, which provides a secured closure
- ▶ A polymer triglide slide attached to the inner Velcro belt for extra safety

NG50033

- ▶ A 4-layered belt, 50mm wide rigid belt
- ▶ A 3-point HD release buckle on the outer belt, which provides a secured closure
- ▶ Velcro on its inner side

CARRYING BAGS

SHOULDER STRAP BAG

The 2164 and 2165 are compact shoulder strap bags mainly designed for a discreet firearm carry. Each of the models has three main compartments, whereas the back one holds a pistol which can be ambidextrously drawn thanks to a couple of polymer D rings placed on top in each corner. Middle compartment can hold any of the following tactical accessories: Handcuffs, flashlight, tactical baton, pepper spray, or simply spare magazines.

MODEL	DESCRIPTION	DIMENSIONS
2164	Large version, has both a handle and a shoulder strap.	Width 20cm, length 26cm
2165	Small version, can be carried on a shoulder strap or worn belt-loop style	Width 17cm, length 23.5cm

FANNY PACK

The 2149 and 2157 are fanny packs mainly designed for a discreet firearm carry. Each of the models has multiple compartments, whereas the back one holds an extra magazine and a pistol which can be drawn thanks to a polymer D ring placed on top right corner

MATERIAL	DESCRIPTION
2149	Basic model
2157	Additional compartment for handcuffs, flashlight and sunglasses

GALIL SLING BAG

- ▶ Ambidextrous shoulder strap with a quick-release buckle
- ▶ On-the-go style carry handle
- ▶ Snap closure concealed pistol carry sleeve on the back panel
- ▶ Two external pockets
- ▶ Main compartment houses a slip pocket with Velcro closure and can accommodate an IPAD/Tablets
- ▶ MOLLE webbing platform for adding extra pouches and gear
- ▶ 9 Liter capacity
- ▶ Available in Black or Coyote colors

RR80129

CARMEL SLING BAG

- ▶ Soft mesh back panel: contours to hip for a comfortable carry
- ▶ Cross body adjustable strap for hands-free carry
- ▶ Back panel access: serves as a potential concealed carry compartment
- ▶ Three external utility pouches: Perfect for a phone, pistol magazine, pepper spray or first-aid kit
- ▶ Large main compartment with draw string closure
- ▶ Ambidextrous shoulder strap w. quick release buckle
- ▶ MP3 or smartphone pocket
- ▶ Zippered slip pocket
- ▶ 4.5 Liter capacity
- ▶ Available in Black or Coyote colors

RR80227

CARRYING
BAGS

TAVOR BACKPACK

- ▶ Reinforced carry handle
- ▶ Mesh padded back panel, allowing constant air-flow, with Velcro top closure
- ▶ Fully adjustable, contoured and padded shoulder straps
- ▶ Medium external organizer pocket
- ▶ MOLLE webbing platform for attaching additional pouches or gear
- ▶ Adjustable waist and sternum straps
- ▶ Quick release compression straps
- ▶ Velcro keepers for excess strap slack

MATERIALS

KYDEX®

Our Thermoplastic holsters are made out of Kydex® sheets formed in a unique and proprietary pressing process, which makes them rugged and reliable, as well as water and chemical-resistant.

We produce these in a wide array of firearm makes and models, left or right, as well as in various colors: Black, Coyote and OD.

Suede lining in these holsters is optional.

LEATHER

Our classic range of holsters is made out of natural-vegetable tanned leather processed without any synthetic additives. The cut, design, and hand-crafted finish of these fine leather holsters are the result of years of design, experience and craftsmanship.

Each Front-Line leather model is formed and produced for a specific pistol/revolver make and model and available in black or brown finishes.

It is also available with suede lining, for both right- and left-handed users.

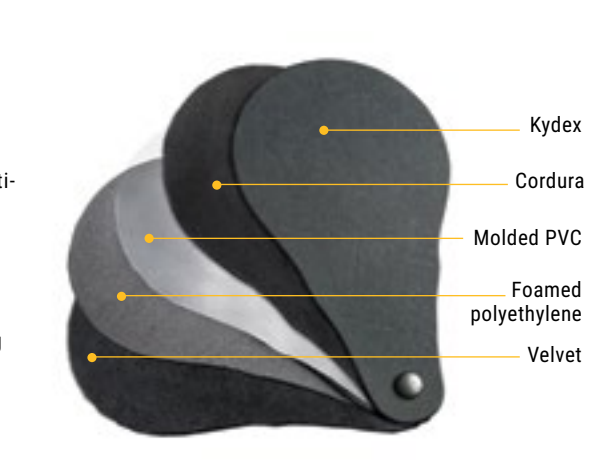

KNG

KNG (Kydex® New Generation) is Front-Lines' proprietary advanced multi-layered material.

It offers all the benefits of Kydex®, plus extra rigidity and protection on your pistol's finish, as well as good looks.

The KNG line integrates in many of our holsters, to include: The drop-leg platforms, law enforcement and EDC holsters.

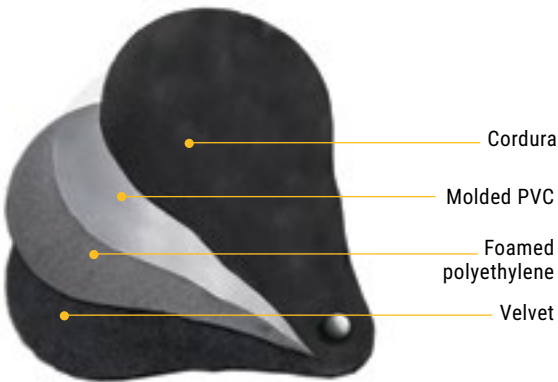

The external Kydex layer is available in Black, Coyote and OD colors.

N.G.

Our N.G. (New Generation) is a multi-layered formed material, which provides a consistent perfect fit that does not change with exposure to water or harsh environments.

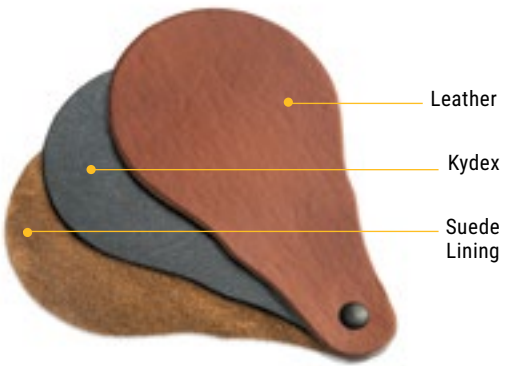

The N.G. holsters are lightweight and durable, whereas the inner velvet material protects the pistol's finish, the foamed polyethylene provides extra impact protection, the molded PVC provides a perfect fit and the Cordura provides extra protection against liquids and other elements.

LKC

The LKC is yet another proprietary advanced multi-layered material made by Front-Line. It offers the classic looks and finish of a fine leather holster, plus the ruggedness of Kydex®, and the extra suede protection for your pistol's finish.

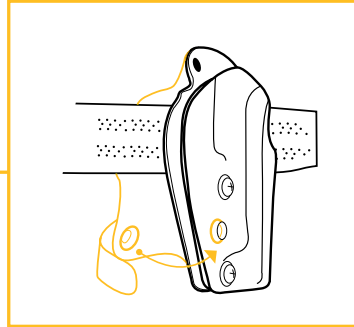

Available in Black or Brown leather.

WEARING OPTIONS

BFL – SNAP-SECURED PADDLE

- ▶ Can be worn with 3 different size belts:
1.2" (30mm), 1.5" (38mm) and 2" (50mm) belts
- ▶ Simply unsnap the safety strap, choose the proper size insert and position it on the two holes of the BFL. Then, close the security strap around the belt. No need to release the belt's buckle.
- ▶ BFL has 8 attachment points to keep the holster intact.

PADDLE

- ▶ Fits up to 1.75" (45mm) Belts.
- ▶ The paddle is connected to the holster with a couple of screws, offering a slight cant adjustment
- ▶ Optional: Insert the belt within the pant's belt loop and this hatch, while carrying the paddle outside the pants.
- ▶ A couple of hooks hold the paddle on the belt firmly
- ▶ Rough surface on the bottom of the paddle keeps the holster intact.

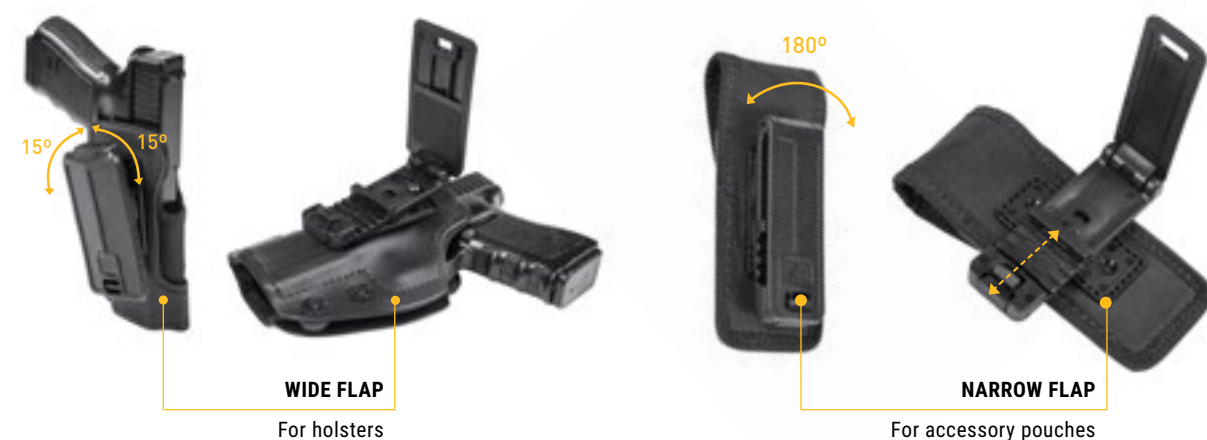

LOW RIDE

- ▶ Fits 2.25" (58mm), 2" (50mm) and 1.5" (38mm) belts
- ▶ Small aperture on the top of the Low Ride plate enables to connect lanyard for extra safety.
- ▶ **5 HEIGHT LEVEL OPTIONS**
The Low Ride plate includes a special, 5-level tunnel, in which one can slide the holster through, providing control on the holster's height.
- ▶ The holster is fixed to the plate by a couple of screws.
- ▶ **INTEGRAL "I"-RAIL**
Integral I rail is connected to the back of the holster by three screws, and can be cant adjustable by removing and changing the bottom screw.
- ▶ **2-SIZE INSERTS**
Two size inserts are available with the plate so to adjust between belt widths.

Q.D / MOLLE / ROTATING

- ▶ Easy holster attach and detach, using a push-button located on the lower part of the mount
- ▶ Can be used with different width of belts - 1.2", 1.5", 2"
- ▶ Rotates

* Can be attached to MOLLE belt / MOLLE vest

WEARING OPTIONS

Front Line's drop leg thigh rig systems were designed specifically for law-enforcement and military applications. It encompasses level 2 or 3 retention and advanced locking systems to ensure a reliable secured carry, yet a swift and smooth draw, which is highly appreciated by operatives working in high-risk environments

The holsters and other optional pouches used on these systems are meticulously built using premium Kydex with suede lining, or our proprietary KNG - a multi-layered material developed by Front Line which combines Kydex with PVC and polyethylene and this, to provide long service life and a high level of comfort, security and ease of use.

DROP LEG SYSTEM PLATFORM

- ▶ Each respective holster has an "I -Rail" on its back which slides onto the platform's center rail and sets it up firmly at the preferred height using a couple of screws.
- ▶ The polymer base platform enables mounting a wide variety of holsters and accessories.
- ▶ Rubber-reinforced double leg straps secure the platform to the user's thigh, and a rubber sheet on the back of the plate prevents it from moving and being flimsy.
- ▶ An additional high-density adjustable strap is secured to the belt.

QUICK RELEASE BUCKLE PLATFORM - OPTIONAL

OPTIONAL WEARING ADAPTORS

The holster with the I-Rail attachment can be worn on either of the following wearing options:

- **DROP LEG PLATFORM** – using Standard Plate TP1000 or QR Plate TPQ1010
- **LOW RIDE** – using LR10 plate
- **BELT LOOP** – using BL10 part
- **MOLLE VEST/QR BELT** – using QR adaptor

LOCKING SYSTEMS

HDL™ – HEAD LOCK

The HDL™ (Head Lock) Retention System is a secured solution for duty and tactical requirements, offering a level II or III retention.

The HDL™ is available on KNG or on Kydex holsters with suede lining, while both come with two adjustable retention screws.

These holsters can be mounted on a drop leg platform, or the belt in different wearing options:

BFL, paddle or Low Ride.

HDL™ level III is operated in a fluent natural dual motion of the thumb by pulling the head cover up, and pushing the lock button down.

This dual-action activates the HDL™ retention system, causing the locking bridge to automatically spring forward, enabling a smooth and swift draw.

The additional couple of adjustable retention screws make it a level III holster.

HDL™ level II includes the lock button only, without the head cover.

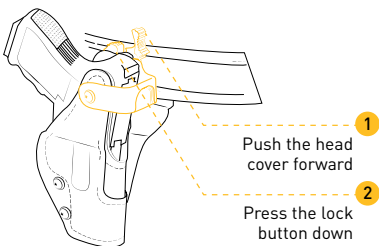

Pushing the lock button down releases the pistol for a smooth draw.

To re-lock the pistol in the holster, pull the bridge backwards and close the head cover.

Adjust the two tension screws according to your needs.

LOCKING SYSTEM

HDL™ Head Lock

SR™ - SIDE RETENTION

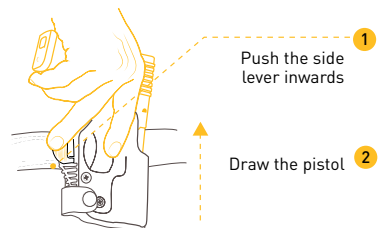

The SR™ retention locks and secures the pistol via the trigger guard once pistol is being holstered.

The SR™ is available in several holster configurations: Open top, thumb-break and HDL holsters and in different materials: KNG, Kydex or Kydex with suede lining.

Pushing the SR™ lever releases the trigger guard for an easy draw.

LOCKING SYSTEM

SR™ Side Retention

PDS™

The PDS™ mechanism locks and secures the trigger guard when the pistol is holstered.

It is a unique mechanism that prevents accidental discharge of the weapon while drawing by keeping the index finger away from the trigger guard in a natural position.

The PDS™ is available in two retention levels:

PDS™ level-1: Pushing the pistol downwards releases the locking lever, which remains unlocked, allowing a swift and smooth draw.

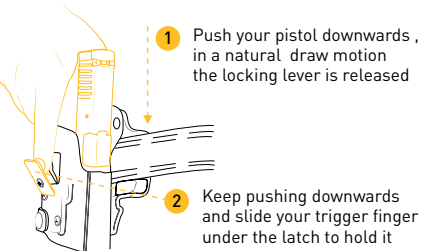

PDS™ level-2: Pushing the pistol downwards and sliding the trigger finger under the latch while the pistol is drawn.

Holsters can be produced in Kydex, Kydex with suede lining or KNG materials.

Special military and L.E OEM department, meeting and exceeding customer's specific requirements and needs, to include current model modifications and new products R&D. Please contact us for further details.

LOCKING SYSTEM

PDS™ Push & Draw System
